# THE NEXT BIG THING IN ACCOUNTING

The accounting industry is changing rapidly with the rise in technology. Technology, a word synonymous with development, has been an effective tool when it comes to industries development.

Technology improves systems and processes, automating manual tasks, and easing off the workload.

Automated accounting process: It is without a doubt that accounting, tax service, and consulting are time-consuming and laborious.

Banking, tax preparation, payroll, audit, and other time-intensive aspects of accounting are rapidly

# Accounting Services for Small Businesses

As self-learning continues to thrive due to artificial intelligence, a task that would have taken days to complete is now done in hours. Technology is taking on most of these repetitive and onerous tasks. The industry has seen a steady increase in efficiency due to integrating technology with accounting processes better. Major software vendors such as Sage, OneUp, and Intuit automated data entry and reconciliation options in companies accounting and bookkeeping especially when we search

Accounting Services for Small Businesses.

This can be directly traced back to the integration of machine learning and AI. Larger firms also use robotic process automation AI integration to increase efficiency by reducing the overall processing

# Outsourcing accounting functions:

Outsourcing might not be new, but the rise in tax and accounting functions outsourcing is primarily due to technological development. One of the benefits of outsourcing is the management of a firm's limited resources without compromising the quality of service received. This also reduces costs such as taxations, salaries, training, benefits, payroll, and other employment costs. Outsourcing now allows CPA firms like [CKO CPAs & Advisors](#) to add value to their business by rendering better service to their clients. The numerous benefit of outsourcing has made this a trend in the accounting industry. This has also created a volume of respected careers globally. All these point to one thing: technology permeates the accounting industry and is
